

SEAFOOD TREATS BUILT FROM THE SOURCE

We've spent decades on the New Bedford docks sourcing premium seafood for human consumption. Dockside closes the market gap by bringing those same human-grade standards straight to pet retail—minimally processed, limited-ingredient, and sourced from the source.

Wholesale only, always — we never compete with the retailers we sell through.

WHY IT'S DIFFERENT

Dock-Direct Sourcing

Backed by Marder Seafood's direct presence on the docks of New Bedford. No brokers, no supply chain gaps — decades of sourcing relationships that put us closer to the fish than most pet treat brands ever get.

Human-Grade & USA Processed

Processed in a USA facility that produces seafood for human consumption. The same standard, the same facility, across every product in the line.

Clean Label

No fillers, no artificial preservatives, no mystery ingredients. Every product in the Dockside line earns its place on the label.
